Work Experience

Front-end Developer [June 2021 - Now]

As a Digital Marketing specialist with a passion for web development, I have gained extensive experience in HTML, CSS, JavaScript, and ReactJS. I have completed multiple projects using these technologies and have developed a strong understanding of front-end development. My background in UX and UI design has given me a unique perspective on web development.

Previous Work Experience

You can find my previous work experience in the [Marketing Field] before shifting my career to "Web Development" → **Here:** [Marketing CV](#)
